Why is it important to attend the second *Belgrade Wealth Forum*?

Second *Belgrade Wealth Forum* scheduled for 28th and 29th of September 2017 is an event which will gather the largest consulting firms and family offices in the areas of wealth management, investment consulting, immigration, tax optimization for companies and individuals, company restructuring and company formation in different jurisdictions. Conference attendees and participants have made direct or portfolio investments **worth more than 20 billion euros** on behalf of their clients, serving more than 10,000 wealthiest clients in the world in HNWI and UNHWI segments (high net worth individuals and ultra-high net worth individuals) whose total assets are worth more than a **hundred billion euros**.

Who should attend the second Belgrade Wealth Forum?

Belgrade Wealth Forum is aimed at individuals and companies interested in current regional and global financial and business trends, especially:

- law offices specializing in monitoring foreign investments and providing tax planning, bank and financial services, and company formation services;
- banks interested in opening non-resident accounts for wealthy individuals and their companies, in the private banking segment
- consultants/advisors providing complex services to foreign private and legal entities on the territory of the Republic of Serbia and the region;
- wealthy individuals from Serbia and the region doing business on the global scale and using services of foreign service providers in the mentioned areas;
- experts on local and international taxes;
- experts on immigration processes and issues;
- companies from Serbia and the region searching for potential investors for their own projects.

How will the Republic of Serbia and the region benefit from the *Belgrade Wealth Forum*?

Every county in the modern society is looking at foreign investments, particularly foreign direct investments, as a means to boost its economy and industry. By hosting this forum, the Republic of Serbia and the City of Belgrade are aiming to promote investment-related topics, further economic development, tourism and cooperation with important firms and companies from abroad. Foreign investments are of key importance for the Balkan countries since their economies had been devastated by wars, economic sanctions and dissolution of the jointly owned conglomerates and companies.

Belgrade Wealth Forum provides an opportunity for setting up business infrastructure and platform for entering the markets of the EU and Russia thanks to the Serbia EU candidate country status.

Highly important are the possibilities for investing in the financial instruments on the Serbian and regional stock markets, which will yield extra profit as a result of increased interest rates on domestic bonds, deposits and similar financial and bank instruments.
